## *The upcoming Album*

The songs from the current album „**Tsunami**“ 津波 (release: 5.17.04) are strongly influenced by the band's new perception of songwriting. The music has become more consistent, with less different parts. The marked preference for a sombre prevailing mood is still there, but many songs were written with a catchy chorus. Neither has the affection for hard guitars died down, so the songs still rock, especially at live performances. The new lead singer Gelgia C. guides through the songs with her delightfully sentimental voice. **Tommy Hein from Berlin** was responsible for the production, giving the album a distinctive touch. With **Sven Friedrich** (Zeraphine) who recorded a duet with Gelgia and contributed in keyboard programming, another highly talented musician could be won for the production of „**Tsunami**“.

The debut album „**Dissolve**“ was produced in the band's own studio in the year 2000. This permitted complete freedom in the creative process which proved to be

a very important step in the band's overall development. The result is a convincing choice of nine songs which represent Cell Division's work from the period 1995-2000.

## *Live*

Large stages, festivals and clubs throughout Europe, e.g. as opening act for artists like **HIM, DE/Vision, Zeraphine, Diva Destruction, Das Ich, Threshold**.

## *Band History*

Cell Division was founded in Zürich, Switzerland in the year 1995 by four people coming from different musical backgrounds. All had been playing in various bands and projects before but were still looking for the band where they could play the music they really wanted to. This was found in Cell Division and the band takes pleasure in producing and perfecting its own and unique musical style and expression. In 2001 former lead singer Yvette G. left the band for private reasons and since then Gelgia C. is enchanting the songs of Cell Division as the new lead singer with her diverse and expressive voice. The studio recordings for the upcoming album „**Tsunami**“ were finished at the end of 2003 in Berlin and as a first release the maxi-single „**Hypnotized**“ with several remixes (e.g. from **Sven Friedrich**) will be in stores shortly before the album at the beginning of May 2004. A videoclip to the single has already been filmed by director Giacun Caduff from Los Angeles.
